[DATE]

[Homeowner]  
[Street Address]  
[City/State/Zip]

Dear [Homeowner],

It has been brought to our attention that recently you have been removing vegetation from behind your home in the Riverwood Community Development District (RCDD) in the protected wetlands. The wetlands are a protected natural resource area and part of the stormwater collection system permitted with compliance enforced by the RCDD and/or the State of Florida. Any cutting, plant removal or other disturbance of the area is strictly prohibited and such action is subject to legal action by the State of Florida. The vegetation is part of the wetlands owned by the CDD and removal of any vegetation is strictly prohibited.

This is a formal written request for you to cease removal of any further vegetation. The vegetation needs to be left in its natural state and any vegetation that you have removed or destroyed may need to be replaced and you will be responsible for the costs.

Please contact our office with any questions.

Thank you.

Calvin Teague  
Riverwood CDD District Manager
